Jay Murphy

Task: Develop the main layout page for dashboard. A front page of sorts, which gathers up and displays information in an aesthetically pleasing manner.
Evaluate: Run the Ruby app and see the code for it in the application view file.
Outcome: Successful, main layout page exists and is aesthetically pleasing

Task: User Authentication
Evaluate: Have sucessful authentication for an admin user. Will have a user that can be signed in for teseting purposes in the read me file.
Outcome: Successful, though the frontend is not in place

Ben Murphy

Task: Add student table with testing
Evaluate: Have passing tests on the fields in the validations.

Outcome: Successful

Task: Student Metrics. Calculate and display different statistcs from the student table to aid in understanding the data.

Evaluate: Multiple different measurements from the student table displayed for the user

Outcome: Successful, but no frontend in place

Task: FERPA Compliance

Evaluate: Compare FERPA rules and implementation and have passing tests for various aspects.

Outcome: Shifted to overall QA issue

Patrick Neal

Task: Add class table with testing

Evaluate: Have passing tests on the fields in the validation.

Outcome: Successful

Task: Develop pages for individual tables. Similar to the main layout page, but for individual tables, displaying the information in an aesthetically pleasing way

Evaluate: Run the Ruby app and see the code for it in the application view files.

Outcome: Successful
